MATHEMATICAL ASPECTS OF TURBULENCE: WHERE DO WE STAND?

“Despite the heavy deployment of effort and resources in the study of turbulent fluid flows for well over a century, fundamental questions remain stubbornly unanswered... this research programme will provide the space for the type of collaborative interdisciplinary thinking necessary for the formulation of new ideas and research directions.”

Turbulence: where do we stand and where are we heading?
4-7 JANUARY 2022 | APPLY BY 03/10/21
> www.newton.ac.uk/event/turw01

Rigorous analysis of incompressible fluid models and turbulence
14-18 FEBRUARY 2022 | APPLY BY 12/11/21
> www.newton.ac.uk/event/turw02

Modelling and analysis of turbulent transport, mixing and scaling
7-11 MARCH 2022 | APPLY BY 05/12/21
> www.newton.ac.uk/event/turw03

Wall-bounded turbulence: beyond current boundaries
28 MARCH - 1 APRIL 2022 | APPLY BY 26/12/21
> www.newton.ac.uk/event/turw03

Advances in geophysical and astrophysical turbulence
16-20 MAY 2022 | APPLY BY 13/02/22
> www.newton.ac.uk/event/turw05
