Groups, representations and applications: new perspectives
6 January 2020 to 20 March 2020

Introductory/instructional workshop
6 - 10 January 2020
Computational and algorithmic methods
27 - 31 January 2020
Interactions between group theory, number theory, combinatorics and geometry
16 - 20 March 2020

K-Theory, algebraic cycles and motivic homotopy theory
6 January 2020 to 20 March 2020

Introductory workshop
6 - 10 January 2020

Infectious Dynamics of Pandemics: Mathematical and statistical challenges in understanding the dynamics of infectious disease pandemics
5 May 2020 - 18 December 2020

Models for an exit strategy
11 - 15 May 2020
Models old and new
18 - 22 May 2020
R - How to estimate and what does it mean?
23 - 25 June 2020
Within-Host Modelling
7 - 8 July 2020
Model Inference
29 - 30 July 2020
Future pandemics
10 - 25 September 2020

Integrating quantitative social, ecological and mathematical sciences into landscape decision-making
7 - 10 September 2020

Innovative mathematics for the modern industrial strategy
3 - 14 February 2020

Due to the COVID-19 pandemic the second half of this programme is postponed until 2022.
