

# Call for Programme Proposals

Annual deadlines: 31 January and 31 July

The Isaac Newton Institute is a national facility based in Cambridge, UK, attracting scientists from all over the world to research programmes in all areas of the mathematical sciences, broadly understood. At any one time it hosts two or three visitor programmes, each with up to thirty participants. For more information see [www.newton.ac.uk](http://www.newton.ac.uk).

153 programmes have been completed to date as per:

<https://www.newton.ac.uk/events/programmes-workshops/programme-archive/>

Administrative support is provided and accommodation and subsistence funding for participants and organisers will be made available.

The Institute now invites proposals for 1-, 4- and 6-month research programmes in any branch of the mathematical sciences including interdisciplinary fields, welcoming in particular those that are adventurous in mathematical scope, in bringing disparate groups together, or in developing novel applications.

Details on submitting proposals are at <https://www.newton.ac.uk/events/submit-a-proposal/>. Anyone interested in making a proposal is encouraged to contact the Director, by telephone or email, for advice and informal feedback.

The Director and Deputy Director will be pleased to help nurture, without prejudicing the final outcome, proposals in the fundamental mathematical sciences as traditionally understood, in cross-disciplinary projects, and in any area where innovative mathematics plays a significant role.

**Contact:** Director, Ulrike Tillmann on [director@newton.ac.uk](mailto:director@newton.ac.uk) or  
Deputy Director, Christie Marr on [deputy-director@newton.ac.uk](mailto:deputy-director@newton.ac.uk)
