

# Call for Satellite Programme Proposals

Annual deadlines: 31 January and 31 July

The Isaac Newton Institute is a national facility based in Cambridge, UK that hosts themed visitor research programmes attracting scientists from all over the world to collaborate together over an extended period on a topic within the mathematical sciences, broadly understood. For more information see [www.newton.ac.uk](http://www.newton.ac.uk).

Over 150 programmes have been completed to date as per:

<https://www.newton.ac.uk/events/programmes-workshops/programme-archive/>

**As part of a new initiative, the Institute is now inviting proposals for 1-month  
SATELLITE RESEARCH PROGRAMMES  
in any branch of the mathematical sciences including interdisciplinary fields to be hosted  
elsewhere across the UK. (Exceptionally, 4- or 6-month programmes may be considered.)**

As per standard INI programmes, administrative support will be provided and funding will be made available to cover accommodation and subsistence for participants and organisers.

The Director and Deputy Director will be pleased to help nurture, without prejudicing the final outcome, such proposals including discussions about the host location, the programme structure including workshops, and the number of participants.

**Anyone interested in making such a proposal is encouraged to contact the Director or Deputy Director for advice and informal feedback.**

Director, Ulrike Tillmann on [director@newton.ac.uk](mailto:director@newton.ac.uk) or

Deputy Director, Christie Marr on [deputy-director@newton.ac.uk](mailto:deputy-director@newton.ac.uk)

or see: <https://www.newton.ac.uk/events/submit-a-proposal/>
